### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention. Specifically, the closest prior art of record, U.S. Patent 6,160,200 to Ehrnsperger et al., fails to disclose a support layer formed of polyethylene oxide that absorbs moisture and become fluidized at a relative humidity of 30%, or at a relative humidity of 50%. The support layer disclosed by Ehrnsperger is designed to be soluble and fluidize under certain conditions, including in the presence of moisture, as disclosed in column 10, lines 50-53. Therefore, at a relative humidity of 100% (i.e. in the presence of moisture), the support layer of Ehrnsperger is soluble. However, the support layer of Ehrnsperger is designed to remain intact until contacted by waste from the user, as disclosed in column 10, lines 36-49. Providing a support layer in the article of Ehrnsperger that fluidizes at a relative humidity of 30% or of 50% would destroy the ability of the support layer to remain intact until contacted by waste, and therefore it would not be obvious to modify the support layer of Ehrnsperger to fluidize at a relative humidity of 30% or of 50%. The prior art of record therefore does not disclose nor fairly suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LYNNE ANDERSON whose telephone number is (571)272-4932. The examiner can normally be reached on Monday through Friday.
